🍽️ *Assignment Question:*

Create an HTML webpage that displays a restaurant menu

1 - The table should contain five columns:

Photo → an image of the food item.
Price → the price of the dish (e.g., 50 EGP, 10 USD).
Name → the name of the dish.
Category → type of dish (e.g., appetizer, main course, dessert, drink).
Size → portion size of the dish (e.g., medium or large).

2 - Include at least five different dishes

One per row , each row consists of one dish information

3 - At the bottom of the table

3. add a final row showing the total number of dishes (e.g., "Dishes count: 5").

4 - Don't forget that :

Use borders, row spacing to make the table neat and easy to read.
