HTML TASK :-
JOB APPLICATION FORM

You are required to create a Job Application Form using HTML.

1. Add a header "Job Application".
2. Create input fields to collect the following information from the user:
   - Full Name
   - Password
   - Age
3. Add an option for the user to select their gender (Male / Female).
4. Include checkboxes or another suitable method for the user to choose the programming languages they are skilled in.
5. Add a field that allows the user to upload their photo as a file.
6. Don't forget to use labels for all input fields.
7. Finally, include a button , with value "Apply" to submit the form.

Goal:
Create a professional and well-structured HTML form following the above requirements
